

# ANSWERING THE CALL FOR MUNICIPALITIES

More and more, municipalities are challenged with managing a variety of household hazardous waste materials in their solid waste programs, while balancing growing expenditures for public education, staff and program management. Fortunately, Call2Recycle® offers a turnkey, no-cost solution for responsible recycling of rechargeable batteries and cellphones.

- Easy-to-use collection program, includes collection boxes, promotional material, and pre-paid shipping, or a bulk shipping option – both offered at no cost
- An online bill of lading wizard walks you through the entire bulk shipping process, including simple and quick generation of required documentation
- Tailored monthly reports for simple tracking of collection types and volume
- Safe handling and recycling of batteries in accordance with the highest industry standards – regulatory compliance is assured with Call2Recycle's R2 certification and e-Steward recognition
- Public education materials to help promote your program
- GreenVantage – a program exclusively for municipalities – can help further offset program costs. Contact Call2Recycle today to learn more!

## ” SUSTAINABILITY STORIES

Because the Call2Recycle program is free, King County has greatly reduced its budget for the costs of managing, shipping, disposing of and recycling the rechargeable batteries. We are saved the logistical as well as the financial burdens of handling these hazardous materials.

JIM NEELY  
KING COUNTY SOLID WASTE DIVISION

Call2Recycle has provided our Moderate Risk Waste facility great service, providing signage and shipping materials, covering the costs of transporting and safely processing the batteries, and giving us useful detailed reports. Now that we ship in bulk quantities, they also provide a payment to us to offset our handling costs. On top of that they have over 35 retail locations providing for convenient collection of batteries from our citizens/their customers. That's great service to the community!

SEGO JACKSON  
SNOHOMISH  
COUNTY SOLID  
WASTE

Working with Call2Recycle has greatly improved the efficiency, both time- and cost-wise, of our rechargeable battery recycling efforts. The bulk shipping option allows us to collect, sort, and ship as our staffing allows, and the reporting data helps us refine the program and plan in advance for the next year's budget. The program makes it easier for our department because it offers everything we need in a partnership.
